

# Evolution of galaxy dynamics over the last 10 Gyrs with MUSE/VLT

l'Observatoire  
de Paris

**Author:** Mercier Wilfried  
**Supervisor:** CONTINI Thierry  
**Co-Supervisor:** Epinat Benoit

June 9, 2019

## IFS:

- ▷ 3D cubes (2D spatial + 1D spectral)
- ▷ photometry + kinematics

## MUSE:

- ▷  $1 \times 1 \text{ arcmin}^2$  FoV
- ▷ 0.2 arcsec spatial sampling
- ▷ spectral range [4650 Å, 9300 Å]
- ▷ seeing or AO observations

MUSE instrument. Credit: Ghaouti Hansali (CRAL)

HST image of MUSE group CGr30

- ▷ 16 MUSE fields in COSMOS area
  - *deep* and *best\_seeing* observations
  - CGr32 split in 3 parts
- ▷  $\sim 500$  field galaxies with [OII] detection
  - HST-ACS counterparts
  - $0.4 \leq z \leq 1.4$

# Checking a couple of parameters

## Half-light radius

spheroidal disk-like irregulars

# Checking a few parameters

## Ellipticity

# Characteristics of our sample

## Redshift distribution

# Characteristics of our sample

## Mass-SFR relation

# Kinematical modelling

## Cleaning galaxies

# Kinematical modelling

## Fitting a model

# First results

## $V_{\max}/\sigma_v$ distribution

## Warning

You can ignore this slide if you're **not** working with Overleaf.

Overleaf, Beamer and Biber do not always get along well together. For this reason, if you make a mistake while writing this presentation, in the drop-down error message you'll **always** get Biber-related error messages.

Luckily, you just have to click on “**go to first error/warning**” and the UI will scroll to the line containing your mistake.

## Warning

You can ignore this slide if you **are** working with Overleaf.

To compile this deck you'll need the **biber** package. Probably your T<sub>E</sub>Xeditor already supports it; if not, you will easily find online the instructions to install it.

If you're not using an editor, you can compile this presentation using the command line by running:

```
$ pdflatex main.tex  
$ biber main.bcf  
$ pdflatex main.tex  
$ pdflatex main.tex
```

For this template we defined four colors, following the graphic profile of Umeå University:

UmUBlue

UmUGreen

UmUPink

UmUGold

You can use these colors as you want in your presentation. For example, you can **color the text in gold** by writing `\{UmUGold\}{my gold text}`.

We also redefined many of the most common L<sup>A</sup>T<sub>E</sub>X and Beamer commands, like `itemize`, `block`, etc. You will see samples of these commands in the following slides.

# This is a page with a title and a subtitle

And also some blocks.

## Goal of the mission

Shoot in the Death Star's exhaust port and destroy it before it can fire on the Rebel base.

## Take care!

TIE Fighters may chase you while approaching the target.

## Use the force you must

Remember your training with Obi-Wan, and use the Force to make the perfect shot.

This is an example of **description**.

**Luke** No. No! That's not true! **That's impossible!**

This is an example of **description**.

**Vader** *I am* your father.

**Luke** No. No! That's not true! **That's impossible!**

This is an example of **description**.

**Vader** *I am* your father.

**Luke** No. No! That's not true! **That's impossible!**

And while we're here, let's have a look to **verbatim** as well, to see how we made items appear in arbitrary order:

```
\begin{description}  
  \item<2->[This is the first item] one  
  \item<1->[This is the second item] two  
\end{description}
```

A formula will look like this:

$$x^2 + y^2 = z^2$$

You can number equations as well:

$$1 + 1 = 2 \tag{1}$$

$$1 + 1 = 2 \tag{custom label!}$$

If you want to use the default L<sup>A</sup>T<sub>E</sub>X math fonts, just go to `beamerfontthemeumu.sty` and uncomment the line containing `\usefonttheme[onlymath]{serif}`.

The usual theorem, corollary, definition, definitions, fact, example and examples blocks are available as well.

## Theorem

*There exists an infinite set.*

## Proof.

This follows from the axiom of infinity. □

## Example (Natural Numbers)

The set of natural numbers is infinite.

Here we display examples of `abstract`, `verse`, `quotation`, and `quote`.

## Abstract

This is an abstract.

*This is a verse.*

*This is a quotation.*

*-Han Solo*

*A quote this is.*

*-Yoda*

You can cite an article

normally using `\cite`, e.g.: **(article1)**

or display the full citation using `\fullcite`, e.g.: **article1**

*(n.d.) stands for "no date". year={A long time ago...}  
is not a date that can be specified in bibliography anyway.*

Look at the code of the following slide to see how to automatically split the bibliography on many slides. You can also use `\nocite{*}` to display the non-cited publications as well.

You can display a frame with a colored background and a huge text in the center using the command `\framecard`.

For example, you can write:

```
\framecard{A SECTION\\TITLE}
```

This will display a frame with a orange background and the phrase "A SECTION TITTLE" in the center. You can also use a custom color with `\framecard`:

```
\framecard{A SECTION\\TITLE}  
\framecard[UmUGreen]{A SECTION TITLE\\  
WITH A CUSTOM COLOR}
```

You can see the results of the commands above in the following slides.

# A SECTION TITLE

A SECTION TITLE  
WITH A CUSTOM  
COLOR

You can display a frame with a background image using the command `\framepic`. The image will be **adapted vertically** to fit the the frame.

For example, you can write:

```
\framepic{graphics/darth}{  
\framefill  
  \textcolor{white}{Luke,\\I am your supervisor}  
  \vskip 0.5cm  
}
```

Alternatively, to make the background 50% transparent, you can write `\framepic[0.5]{graphics/darth}...`

You can see the results of the commands above in the following slides.

Luke,  
I am your supervisor

A full-page background image of Darth Vader from Star Wars. He is shown from the waist up, wearing his iconic black helmet and suit with a cape. He holds a glowing red lightsaber in his right hand, which is positioned diagonally across the frame from the bottom left towards the center. The background is a smoky, greyish-white with a red, flame-like effect on the left side.

Right-aligned text with  
Semi-transparent background

We provide two other bonus commands:

**pdfnewline** you can use `\pdfnewline` to avoid the annoying `hyperref` related warnings when using newlines in the document's title, author, etc. For example, in this presentation the author is defined as:

```
\author[Luke Skywalker]{  
  Luke Skywalker, Ph.D.  
  \pdfnewline  
  \texttt{luke.skywalker@uniud.it}  
}
```

**marker** you can use `\marker` to highlight some text. The default color is `pink`, but you can also `use a custom color`. For example:

```
\marker{Default color}  
\marker[UmUGold]{Custom Color}
```

`framefill` you can use `\framefill` to put the text at the bottom of a slide by filling all the vertical space.
